DOB – 12/07/2005

kevinbabu.mec@gmail.com
+91 7306081142

SKILLS & INTERESTS

- Technical Skills:** Python, Java, C, PostgreSQL, Node.js, React, HTML, CSS, JavaScript, Firebase, Machine Learning, Data Structures and Algorithms, Adobe Illustrator, Figma, Next.js, Flutter, Django, Docker
- Soft Skills:** Communication, Problem Solving, Teamwork, Leadership, Adaptability, Critical Thinking, Attention to Detail, Organisational Skills, Time Management, Team Collaboration, Creativity, Interpersonal Skills
- Interests:** Full Stack Development

EDUCATION

- Govt. Model Engineering College** 7.79 | 2027
KTU, B. Tech in Computer Science Engineering
- St. Antony's Public School, Annakal** 94% | 2023
CBSE, 12th
- Navy Children School, Kochi** 93% | 2021
CBSE, 10th

WORK EXPERIENCE

- Mispa Technologies** Ongoing
Software Developer Intern
Technologies Used: Python, AWS, Django
Gaining an understanding of cybersecurity and IT security operations at an international security and consulting provider. Exploring key areas including secure IT infrastructure, threat monitoring, cloud security, and protection against cyber threats such as ransomware and phishing.

PROJECTS

- Retail Sales Data Engineering Pipeline** Team Size: 5
Data Engineer Ongoing
Technologies Used: Python, Pandas, SQL, Apache Airflow, Azure, PostgreSQL, FastAPI, Docker, Git, GitHub
Developing an end-to-end ETL pipeline for **641K+** retail sales records using **Python, Pandas** and **PostgreSQL**, automating data workflows with **Apache Airflow** and providing API access through **FastAPI**, while leveraging **Azure, Docker**, and Git for cloud deployment, containerization and collaborative development.
- Advanced Learning Platform** Team Size: 4
Full Stack Developer Ongoing
Technologies Used: Next.js, TypeScript, Supabase, Monoco, Python
Developing an adaptive coding learning platform using **Next.js, Supabase** and **Python** that analyses individual and cohort data to personalise student learning paths—engineering an AI evaluation pipeline for structured mastery datasets, designing aggregate **SQL** queries for cohort trends, and delivering insights across **1,400+** problems on a public dashboard for **70+** students.
- Placement Cell Website** Team Size: 2
Full Stack Developer 1 month
Technologies Used: Next.js, Django, PostgreSQL
Developed the official Placement Cell portal for Govt. Model Engineering College using **Next.js, Django** and **PostgreSQL**. Built **10+** modules including recruiter management, student profiles, placement drives and analytics, serving **1,500+** students and placement coordinators.
- API Benchmarking Tool** Team Size: 1
Full Stack Developer 1 Week
Technologies Used: Node.js, React.js, WebSocket
Built an API Stress Dashboard using **Autocannon** to simulate high-concurrency traffic, streaming real-time telemetry on **p99 latency** and resource usage via **Server-Sent Events**. Designed a normalized **SQLite** schema to persist historical test runs and implemented SQL-based trend analysis to surface degrading endpoint performance over time.

COURSES AND CERTIFICATIONS

- Obtained certification in **Intro to Machine Learning** from **Kaggle**, demonstrating proficiency in Machine Learning basics.
- Received a certification in **Intro to Deep Learning** from **Kaggle**, applying skills to Deep Learning and Neural Networks.
- Received a certification in **Introduction to agent skills** from **Anthropic**, demonstrating proficiency in tool use and function calling.
- Successfully completed the **Generative AI & Data Science Micro Internship** program offered in collaboration with **IBM SkillsBuild** and **CSRBOX**.

KEY POSITIONS

- Placement Cell Coordinator**, Govt. Model Engineering College.

ACHIEVEMENTS AND ACTIVITIES

- Attended **MEC.CONF 2024**, a two-day conference on emerging technologies, conducted by **IEEE MEC SB**.
- Hobbies:** Reading, Travelling
